

THE WOLVERINE STACK

Ultimate Healing & Recovery Stack

Introduction

The Wolverine Stack combines BPC-157 and TB-500, two powerful peptides aimed at enhancing healing, recovery, and regenerative processes. This stack is favored for its synergistic effects on tissue repair, inflammation reduction, and overall recovery.

- **BPC-157**
 - Peptide derived from a protein in the stomach that accelerates healing, reduces inflammation, and supports tissue regeneration
- **TB-500** - Synthetic peptide that promotes tissue repair, enhances cell migration, and modulate inflammation

Components of the Wolverine Stack

BPC-157

- ✓ Accelerates healing of muscles, tendons, and ligaments
- ✓ Reduces inflammation and oxidazive stress.
- ✓ Supports gut health and tissue regeneration

TB-500

- ✓ Promotes tissue repair and cell migration
- ✓ Enhances angiogenesis and cell migration
- ✓ Modulates immune response and inflammation

For Research & Educational Use Only

Not for human or veterinary use
