

# DISP

## Vial

### What is DISP?

DISP is a nootropic peptide fragment derived from **Delta Sleep-Inducing Peptide**, designed to promote deep rest, cognitive reset, and neural detox.

### Key points:

- Peptide fragment: **DISP (5 amino acids)**
- Targets sleep regulation & memory consolidation
- Enhances glymphatic flow (brain detox during sleep)
- Reduces mental fatigue, improves dream clarity
- Ideal for high-stress, high-output individuals

### Benefits of DISP Vial

- ✓ **Deepens Restorative Sleep**  
Supports Delta wave activity & longer REM cycles
- ✓ **Cognitive Reset**  
Improves memory, focus & next-day clarity
- ✓ **Neural Detox Support**  
Enhances brain waste clearance during sleep

- ✓ **Reduces Mental Overload**  
Calms racing thoughts & stress loops
- ✓ **Dream Recall & Emotional Balance**  
Encourages vivid, insightful dreaming
- ✓ **Non-Habit Forming**  
Safe for nightly or cyclical use

For Research & Educational Use Only  
Not for human or veterinary use
