

SEMAX

Nasal Spray

What is Semax?

Semax is a synthetic peptide derived from adrenocorticotrophic hormone (ACTH) designed to enhance cognitive function, focus, and mental performance.

Key points:

- A nootropic peptide derived from ACTH (4-10) fragment.
- Designed to boost cognitive function, focus, and mental clarity.
- Modulates neurotransmitter levels, including dopamine and brain-derived neurotrophic factor (BDNF).
- Developed to enhance learning, memory, focus, and overall mental performance.

Benefits of Semax Nasal Spray

✔ Enhances Cognitive Function

- Improves focus, attention, and mental clarity.

✔ Improves Memory

- Supports better recall and learning abilities.

✔ Improves Memory

- Supports better recall and learning abilities.

✔ Neuroprotective Effects

- Promotes neural health and protects the brain from stress and damage.
