

GLOW

BPC-157, GHK-CU & Tb-500 Peptide

What is GLOW?

GLOW is a synergistic blend three peptides known for their healing and regenerative properties.

Key points:

- **BPC-157:** Peptide known for promoting healing, reducing inflammation, and enhancing tissue repair.
- **GHK-Cu:** Copper peptide known for stimulating collagen production, promoting healing and supporting skin health.
- **Tb-500:** Peptide known foaccelerating tissue healing, reducing inflammation, and supporting recovery of muscles, tendons, and ligaments.

Benefits of GLOW

✔ Promotes Healing

- Speeds up wound and tissue healing.

✔ Reduces Inflammation

- Lowers inflammation and may reduce pain.

✔ Boosts Energy & Vitality

- Aids in the recovery of muscles, joints, tendons, and ligaments.

✔ Enhances Skin Health

- Improves skin repair, boosts collagen production, and reduces wrinkles.

✔ Boosts Tissue Repair

- Stimulates the regeneration and repair of tissues.
